Run Recovery Application

Snake Recovery System

The back up process is designed to recover games.Json file to a previous operating state, in case of a hardware or operating system failure.The recovery process will begin by starting this application and will generate a back-up files in a stable duration according to your choice ,The process will then save a recovery environment, which you can use in case your files deleted or damaged or you just want to get back to the last version . (see recovery folder)

back up time

Next Back Up :

start proccess in background

stop proccess

© 2019 Piranha Team , MIS - Haifa University
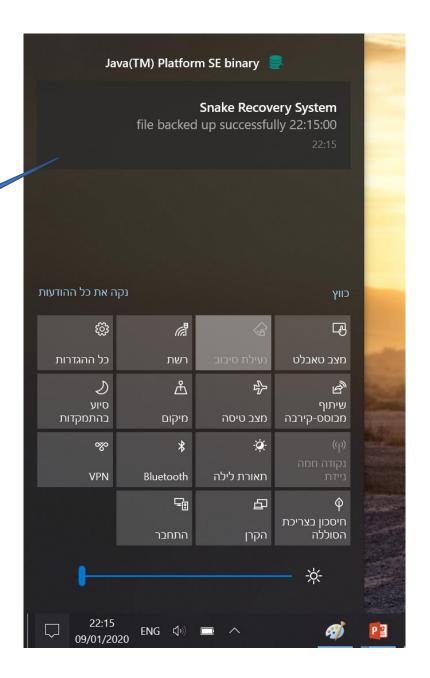

Set back up time

Running status

Activate back up

Stop back up

Once you activated the process you can close the window , the system will continue to work on the system tray and will back up the games file according to the time you picked
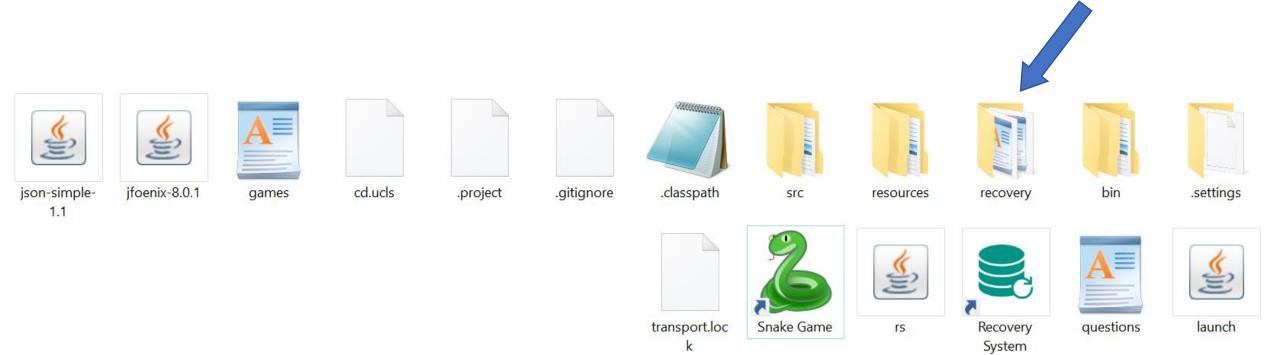

Snake Recovery System activated
files backup set to 09/01/2020 22:15:00

22:08
09/01/2020 ENG

The next update

Right click to re open the system

date

hour

- So by keeping recovery system on , your game's data is safe and backed up , even if your computer set to sleep It will run the backup minutes after computer wakes up in case you missed a back up while your computer was sleeping.

- if you forced pc shutdown you are going to need to open it again
